

INSTRUCTION SHEET

C48649 KIT - C14419 REPLACEMENT BEARING

(Used on Snowblowers & Tractors)

The bearing in this kit requires a larger clearance hole 2-1/8" for the flangette.

Use the template provided to enlarge the hole.

TOOLS REQUIRED

Eye Protection: Safety Glasses or Goggles
Cylinder Shape Burs or Abrasive Points

1/2" SAE Wrench
Die Grinder like a Dremel
Touch Up Paint

PROCEDURE:

1. Remove existing bearings, flangettes & shaft assemblies.
2. Secure template to most accessible surface.
3. Enlarge hole using a hand held die grinder (like a Dremel).
4. Remove template.
5. Remove sharp edges.
6. Paint exposed metal.
7. Reassemble.
